# PB-2000 Perfect Binding Machine

EP Technology has designed the new perfect binding machine PB-2000, which is based on the concept of "on-demand" binding. It is excellent for books, corporate reports, manuals, brochures, and annual reports.

## Features

### Table-top Design

PB-2000 makes the perfect binding affordable to the ordinary companies. Its table top design especially covers the binding needs of wide range of companies: from print shops to offices, from general administration to schools, from banks to libraries.

### Simple Operation

Easy to use, no special skill is needed. Only by pressing a button, you get a fast bind with professional looking results.

### Professional Finish

--The cover is glued with the book spine and clamped with neat finish, which shows a professional binding quality. The book lasts for years with no loose pages.

--A Roughing cutter makes the book binds stronger with the covers.

--No extra adjustment is necessary for books of different thickness.

### Reduce your binding supplies inventory

You can choose your own cover material: paper, plastic, transparent overlays, thin sheets or card stock. You can even print or copy your own covers in house for personalized professional finish. There is no need to stock a variety of rods, plastic supplies or spiral combs.

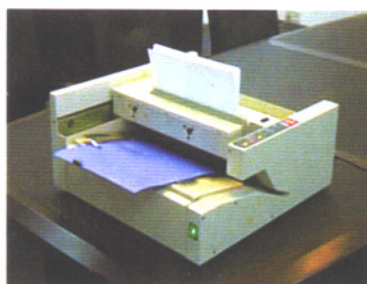

### Specifications

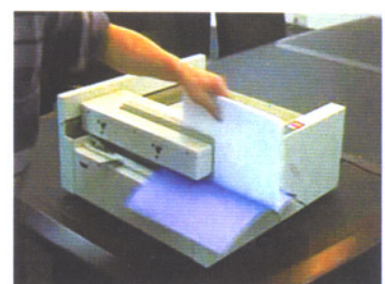

Model:	PB-2000
Maximum Spine Length:	330mm(12.4")
Maximum Binding Thickness:	38mm(1.5"),380 sheets
Minimum Binding Thickness:	5 sheets
Production Speed:	1 Book / 30s, up to 120 books/hour
Binding Glue Type:	Hot Melt Glue
Warming Up Time:	20 Minutes
Power:	220V-50Hz
Power Consumption:	1050W
Machine Dimensions:	650x550x270mm
	25.6"x21.7"x10.6"
Machine Weight:	58kg(127lbs.)

Insert the Cover and Sheets

Machine automatically binds

Done! Take out of the book
